

## **Induction range Metos Ardox IE2**

## **Product information**

SKU 4210064

Product name Induction range Metos Ardox IE2

Dimensions  $500 \times 800 \times 900 \text{ mm}$ 

Weight 50,000 kg

Technical information 400 V, 16 A, 10 kW, 3PE, 50 Hz

## Description

Induction range, 2 zones Diameter of the zones 260 mm. Made completely out of stainless steel. On an open stand with a stainless shelf.

Fast, efficient and safe.

- Induction range produces virtually no excess heat to the kitchen
- Considerably faster than an electric or gas range
- Immediate reaction to power adjustment
- The range itself does not warm up and is always cooler than the cooking vessel
- Spill-overs do not burn in the cool surfaces
- Heat is produced only when a cooking vessel with min diam. 120mm is on the zone
- Energy consumption significantly lower than that of an electric range

Because of the operating principle, the cooking vessels used must have a

magnetic bottom.

Best results can be achieved with steel vessels with either sandwich or compoind bottom.

Most cast iron cooking vessels work.

Aluminium vessels are not recommended and they usually do not work.
