Description

A small, simple rack conveyor machine for use when the capacity of a single-tank dishwashing machine is not sufficient.

The Metos WD-11 is a simple, compact and flexible rack conveyor machine with a medium capacity and excellent wash results.

The machine comes with a chemical washing zone, a dual final rinse and an electronic control system as standard.

The WD-11 has unique basket feed system which allows for a flexible operator contact time. The recommended capacity is 50 to 85 baskets per hour, which the operator can adjust depending on how dirty the loads are.

The large, well-balanced sliding doors make all the washing areas easily

accessible. The doors can also be removed to allow the back of the machine to be cleaned.
