Dimensions	400 x 730 x 870 mm
Weight	70,000 kg
Technical information	400 V, 7,8 kW, 3NPE, 50/60 Hz

Description

The Metos Diamante D72 / 10GEP grill with stand has cooking surface of 350 x 550 mm. The baking tray gives the crispy grilled surface without drying it. The water vapor from the water basin keeps the grilled food succulent. Stainless steel high-performance 7.8 kW heating element is adjustable from a 6-position control knob. The control panel has an indicator light that lights up when the grill is turned on.

The grill is easy to keep clean because the heating element can be turned to the side during cleaning. In addition, the water / grease collection box is easy to empty. Splash guards on the sides and back of the device protect the environment from splashes.

The Metos Diamante 70 dining set is designed in every detail to be an effective and functional solution from preparation to cooking, without losing sight of its easy cleaning. Sturdy, stylish and hygienic Diamante 70 Series is available as a table top model or with a stand, single or multiple combination, from small to large size kitchens.
