

## Mobile Gateway Metos SmartKitchen 4G

### Product information

---

SKU	4008048
Product name	Mobile Gateway Metos SmartKitchen 4G
Dimensions	100 × 58 × 25 mm
Weight	0,400 kg
Technical information	230 V, 1NPE, 50/60 Hz

### Description

Metos ioLiving Mobile Gateway is a ready-to-use data transmission device for use with Metos ioLiving self-monitoring applications. The device is equipped with an Internet connection, as it has a factory-installed international SIM card (24 months). The device connects to the 4G network in almost all European countries. In Finland, the device connects to Telia's and DNA's networks, depending on which has a better field.

The Mobile Gateway receives measurement data from ioLiving measuring devices via Bluetooth and LoRa radios and transfers the measurement data to the ioLiving online service. The device automatically connects to the Internet using a factory-installed SIM card, so you do not need to connect to a Wi-Fi or LAN network. The gateway contains a battery that lasts for 24 hours, even when not plugged in. Thanks to the battery, the measurement data is also transferred during a power failure.

The device is immediately ready for use:

- turn on the power

- connect the charger to a socket

Technical information

Power supply: Works with the included USB charger and battery,  
battery capacity 24 hours

Splashproof: IP65

Indicator lights: LEDs (red, blue and green) indicate  
device operation and possible error conditions
