| Weight | 220,000 kg |
| Capacity | 490 litres |
| Technical information | 230 V, 0,900 kW, 1NPE, 50 Hz |
| Type of the refrigerant | R290 |

Description

Metos Luxor Classic Slim KG8G is an elegant, innovative and adaptable vertical slim freezer display that creates an attractive and exclusive environment for the products sold. In addition to the walls and shelves that are made of hardened glass, the thin rack shelves that are powered with static cooling allow for an unobstructed view of the products inside the display.

At only 60 cm wide, the Metos Luxor Classic Slim KG8G vertical freezer display is intended for storing of frozen confectionery products and ice-cream. Equipped with five (650x460 mm) rack shelves, one glass shelf, LED-lights and a right hinged door, the vertical cold display creates a clear and light frame for products. The display's cold area can be set to between -25°C...-15°C. The display has a static cooler, which distributes the air evenly across the whole area.

The lower part of the display is made of stainless steel with an anti-fingerprint serigraphy surface. The lower part of the frame masterfully hides the wheels, enabling the easy movability of the display.

- five cold rack shelves (650x460 mm) and a glass shelf (650x420 mm)
- cold area -25°...-15°C
- right hinged door
- LED-lights at the front of the display, behind the door
- electronic control board with a digital screen
- HACCP alarm system
- manual melting
- heating elements that prevent the compression of moisture
- stainless steel lower frame, grey silk printed display frame, hardened glass walls, stainless steel shelf support system
- the display works in an environment where the max. temperature is +30°C and the relative humidity is 55%

Delivery includes:

- five rack shelves and a glass shelf
