Description

The plastic tap bags, works with the stylish Metos Novocold Mini. You can serve any still drink from the tap bag. An ideal solution for serving pre-cooled coffee milk and coffee cream in a serving line. It is also suitable for serving special juices, e.g. at hotel breakfasts.

The bags can be pre-filled in advance, stored in a cold room, and in the middle of a rush, an empty bag can be quickly replaced with a full one. The bag filling stand comes with the machine, to help out the filling and closing of the bag. The left overs from the "empty" bag can be poured over to the new bag, since the drink has been stored in a hygienic space, inside the closed bag, this way you can reduce waste.

In one cartone is 250 pcs of bags.
