

Espresso machine Metos Classe 5 ECO USB 2GR Compact Tall

Product information

SKU	4157751
Product name	Espresso machine Metos Classe 5 ECO USB 2GR Compact Tall
Dimensions	611 × 539 × 520 mm
Weight	55,000 kg
Technical information	220-240 V, 10 A, 2,9 kW, 1NPE, 50/60 Hz, 70 dB CW: G3/8 Drain: ø 14 mm

Description

Metos Classe 5 ECO USB 2GR Compact Tall is an automatic espresso machine equipped with an insulated boiler, which prevents unintentional heat loss for an increased thermal performance and power efficiency, guarantees an energy saving of 15%. Its dimensioning allows dispensing into tall drinking glasses and take-away mugs (maximum height 14.5 cm). In the design of the Compact models, special attention has been paid to efficient use of space. The espresso machine with two coffee groups, two steam taps and a hot water tap is only 611 mm wide. The device is well suited for use in, for example, a small café, restaurant or hotel.

Clear buttons and built-in automation make it easy to use. The daily cleaning cycle is automatic and finishes in five minutes. Black side panels, shiny stainless steel that dominates the front and clearly

distinguishable steam tap levers give the machine a stylish look. It only takes three minutes to remove the body panels and cup tray to access the main internal parts.

Patented Steady Brew (SB) technology is the evolution of the traditional thermosiphon system and introduces a set of innovative features designed to improve the performance of all single-boiler espresso machines. By keeping the water temperature stable during extraction, Steady Brew guarantees excellent thermal stability, reliability and maximum repeatability, both during busy periods and in low usage conditions.

- two brewing units, two steam taps and a hot water tap
- possibility to use tall (<14.5 cm) drinking glasses and regular cups
- insulated ECO boiler size 5 liters
- separate gauges for boiler and pump pressures
- USB port
- black ABS plastic side panels protect the machine from knocks
- front panel in mirror-polished stainless steel
- clear and easy to use keyboard
- to facilitate maintenance, the technical components are positioned so that they can be exposed by removing the panels from the front of the device in 3 minutes
- easy to clean
